______________________________________________________________________________

I agree to supervise this student on this Directed Research project, as prescribed by the regulations on the reverse side.

________________________________________  Supervising Faculty Member

PLEASE FORWARD TO LAW SCHOOL RECORDER FOR PROCESSING
A student may engage in collaborative research with a faculty member under the faculty member’s supervision. Such research may facilitate a faculty member’s work and may be on a topic identified by the faculty member, but must both involve independent research by the student and convey the fruits of that research through one or more papers, memos, or other written products prepared by the student. The intent is to provide an opportunity for substantive collaborative research with faculty. The faculty member shall determine and clearly convey to the student the subject matter of the research; the scope of the collaboration; the type, number, length, and due dates of written work; the number of credit hours; and the intended duration of the collaboration. A student may not register for a B707 Directed Research project without the written approval of a faculty supervisor. A student may complete Directed Research for 1-3 credit hours during or between semesters. Directed Research shall not satisfy any writing requirement for graduation.
